Portable CNC. Locks, hinges, pivots and more.

Clamp to the door.
Cut the edge.
Swing to the face.

Precise and repeatable. Easy for beginners, ready for batches.

Wood, aluminium, iron, steel and acrylic, with the right cutter.

Main travel
300 mm

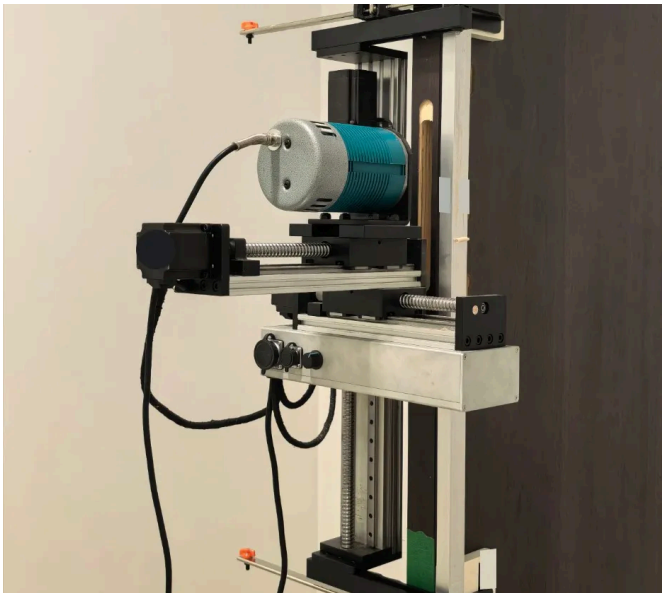

Clamp range
0–250 mm

Cutting depth
Up to 150 mm

Longer than 300 mm? Cut it in sections.

Cutting depth depends on the cutter.

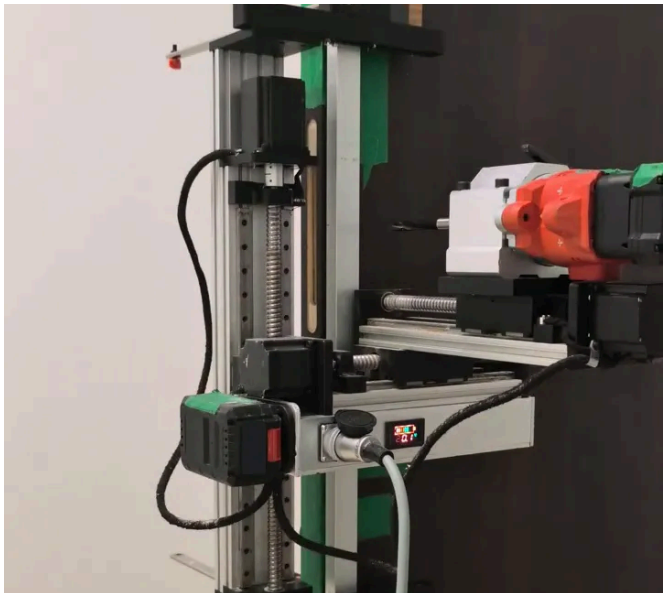

Two ways to power it

1000 W mains motor

US$3,499

A complete machine with its own motor.

Your own trim router

US$3,499

Powered by its battery. Router not included. Model confirmed at order.

Prices are in US dollars and exclude freight, import duty and taxes. They may change until confirmed on the manufacturer's quote.

What it does

- Locks, butt and concealed hinges, pivot hinges and more
- Wood, aluminium, iron, steel and acrylic, with the right cutter
- Reusable templates for precise repeat and batch work
- Touchscreen, three driven axes and template generation software

To get a quote

Send your lock template, door material and thickness, edition and delivery city.
